📊 PageSpeed Enhancer — Audit Report

🔗 http://localhost:3000

🗓️ Diaudit pada: 27/10/2026, 23.50.51 | 🛠️ Lighthouse v13.5.0

Skor Keempat Pilar

26	94	96	100
Performance	Accessibility	Best Practices	SEO

Core Web Vitals & Metrik Lab

Metrik	Nilai
First Contentful Paint (FCP)	🔴 3.09s
Largest Contentful Paint (LCP)	🔴 22.04s
Total Blocking Time (TBT)	🔴 7648ms
Cumulative Layout Shift (CLS)	🟢 0.002
Speed Index (SI)	🔴 15.20s
Time to Interactive (TTI)	🔴 34.23s

Audit yang Perlu Diperbaiki (Top 30)

Nama Audit	Skor	Deskripsi
Largest Contentful Paint	0	Largest Contentful Paint marks the time at which the largest text or image is painted. [Learn more about the Largest Con
Speed Index	0	Speed Index shows how quickly the contents of a page are visibly populated. [Learn more about the Speed Index metric](ht
Total Blocking Time	0	Sum of all time periods between FCP and Time to Interactive, when task length exceeded 50ms, expressed in milliseconds.
Max Potential First Input Delay	0	The maximum potential First Input Delay that your users could experience is the duration of the longest task. [Learn mor
Browser errors were logged to the console	0	Errors logged to the console indicate unresolved problems. They can come from network request failures and other browser

Nama Audit	Skor	Deskripsi
Reduce initial server response time	0	Keep the server response time for the main document short because all other requests depend on it. [Learn more about the
Time to Interactive	0	Time to Interactive is the amount of time it takes for the page to become fully interactive. [Learn more about the Time
Minimize main-thread work	0	Consider reducing the time spent parsing, compiling and executing JS. You may find delivering smaller JS payloads helps
Reduce JavaScript execution time	0	Consider reducing the time spent parsing, compiling, and executing JS. You may find delivering smaller JS payloads helps
Missing source maps for large first-party JavaScript	0	Source maps translate minified code to the original source code. This helps developers debug in production. In addition,
Background and foreground colors do not have a sufficient contrast ratio.	0	Low-contrast text is difficult or impossible for many users to read. [Learn how to provide sufficient color contrast](ht
Heading elements are not in a sequentially-descending order	0	Properly ordered headings that do not skip levels convey the semantic structure of the page, making it easier to navigat
Reduce unused CSS	0	Reduce unused rules from stylesheets and defer CSS not used for above-the-fold content to decrease bytes consumed by net
Reduce unused JavaScript	0	Reduce unused JavaScript and defer loading scripts until they are required to decrease bytes consumed by network activit
Page prevented back/forward cache restoration	0	Many navigations are performed by going back to a previous page, or forwards again. The back/forward cache (bfcache) can
Document request latency	0	Your first network request is the most important. [Reduce its latency] (https://developer.chrome.com/docs/performance/ins
Forced reflow	0	A forced reflow occurs when JavaScript queries geometric properties (such as offsetWidth) after styles have been invalid
Improve image delivery	0	Reducing the download time of images can improve the perceived load time of the page and LCP. [Learn more about optimizi
LCP breakdown	0	Each [subpart has specific improvement strategies] (https://developer.chrome.com/docs/performance/insights/lcp-breakdown)
Network dependency tree	0	[Avoid chaining critical requests] (https://developer.chrome.com/docs/performance/insights/network-dependency-tree) by re
Render-blocking requests	0	Requests are blocking the page's initial render, which may delay LCP. [Deferring or inlining](https://developer.chrome.c
First Contentful Paint	5	First Contentful Paint marks the time at which the first text or image is painted. [Learn more about the First Contentfu

Nama Audit	Skor	Deskripsi
Avoid enormous network payloads	50	Large network payloads cost users real money and are highly correlated with long load times. [Learn how to reduce payloa
Minify CSS	50	Minifying CSS files can reduce network payload sizes. [Learn how to minify CSS](https://developer.chrome.com/docs/lighth
Minify JavaScript	50	Minifying JavaScript files can reduce payload sizes and script parse time. [Learn how to minify JavaScript](https://deve
Legacy JavaScript	50	Polyfills and transforms enable older browsers to use new JavaScript features. However, many aren't necessary for modern
